Dear Parents/Caregivers

HEADLICE

We have had reports of Head lice in Wairaka Tahī. Please check your child's scalp and if you find he/she has been infested please take prompt action. Please check your child's head **every night** so that we can eliminate this problem and stop the re-infestation across siblings.

To reduce the spread the Health Department recommends:

- All children should brush hair every day - brushing may help kill or injure lice and stop them from laying eggs.
- Brushes and combs should not be shared (even within the family).
- Children should hang their clothes on their own hook at school.
- Sunhats (or any other hat) should not be shared.

Please help to stop these pests.

Yours sincerely

Melanie Rooy
